## CAREER OBJECTIVE

Computer Science and Engineering student at AIUB focused on full-stack development. Seeking a software development internship to work on web applications, APIs, and testing.

## TOOLS & TECHNOLOGIES

**Desktop applications** · Java, Swing, file handling
**Web applications** · TypeScript, JavaScript, React, Next.js, CSS, Tailwind CSS
**APIs and data** · Python, FastAPI, SQL, SQLAlchemy, Supabase
**Search and investigation** · LangChain, LangGraph, vector and keyword retrieval
**Development workflow** · Git, GitHub Actions, pytest, Vitest
**Relevant Coursework**
Machine Learning, Computer Vision and Pattern Recognition (CVPR), Data Science,
Human Computer Interaction (HCI), Management Information Systems (MIS)

## PROJECTS

**LibraTrack** (Java, Swing) [GitHub]
- Desktop app for managing a library catalog, student accounts, and loans.
- Added first-run setup for local account files and checks for remembered sessions.

**FirstPR** (TypeScript, Next.js, Supabase) [GitHub]
- Ranks open-source issues using evidence from a developer’s public GitHub repositories.
- Summarizes repository setup and checks local branches before a pull request.

**IncidentLens** (Python, FastAPI, LangGraph, Next.js) [GitHub]
- Investigates failures using logs, source code, commits, and deployment records.
- Combines vector and keyword retrieval and links findings to supporting evidence.

**Countersign** (Python, FastAPI, SQLAlchemy, Next.js) [GitHub]
- Reconciles invoices against purchase orders and delivery records.
- Flags duplicates and price discrepancies for human review.

## EDUCATION

**American International University-Bangladesh (AIUB)**
